

AUTOMATIC COOKTOP FIRE SUPPRESSION

SINCE 1972

STOVETOP FIRESTOP RANGEHOOD®

StoveTop FireStop® automatic fire suppressors are the first line of defense against stovetop fires, recommended by fire chiefs and fire prevention experts. StoveTop FireStop Rangehood is inexpensive, invisible, and invaluable.

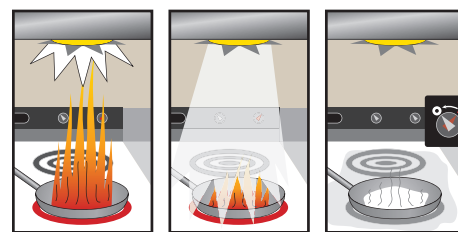

Cooking fires remain the number one cause of residential structure fires, with unattended cooking cited as the leading cause of these fires.

With StoveTop FireStop, customers report an average of 99% reduction in fire claim costs.

HOW DOES THE RANGEHOOD WORK?

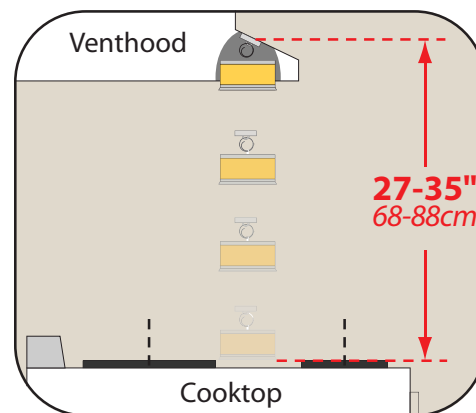

- » A pair is needed per cooktop. Center canister between front and back burner on each side of the cooktop
- » Delivers fire-suppressing powder automatically to both front and back burners when flame activated
- » Alerts residents with a "pop" sound

HOW DO I INSTALL THE RANGEHOOD?

StoveTop FireStop Rangehood attaches with a magnet to the underside of the vent hood. To install:

1. Attach the ring to the magnet and to the top of the StoveTop FireStop canister.
2. Center each canister between the front and back burner on each side of the stove.
3. Lift canister straight up and attach.
4. Repeat steps 1-3 for the second canister on the other side of the stove.

Use your smartphone's barcode reader to see StoveTop FireStop Rangehood in action.
